Part IV

Future Tenses

Chapter 10

Future Tenses

Future tenses describe actions or events that will happen. They help you express plans, predictions, schedules, and actions that will be completed at a later time. Mastering these forms improves clarity and effectiveness in everyday communication.

10.1 Future Simple (Will)

The future simple with “will” expresses decisions made at the moment of speaking, general predictions, promises, offers, and future facts.

Future Simple (Will)

Structure:

- Affirmative: Subject + will + base verb
- Negative: Subject + will not (won't) + base verb
- Interrogative: Will + subject + base verb?

Examples:

- “I’ll call you later.” (decision now)
- “It will rain tomorrow.” (prediction)
- “We won’t be late.” (negative)
- “Will you help me?” (offer/request)

10.2 Future Simple (Going To)

The future simple with “going to” is used for planned actions or intentions and predictions based on present evidence.

Future Simple (Going To)

Structure:

- Affirmative: Subject + am/is/are + going to + base verb
- Negative: Subject + am/is/are not + going to + base verb
- Interrogative: Am/Is/Are + subject + going to + base verb?

Examples:

- “I am going to start a new job next month.”
- “She is not going to attend the meeting.”
- “Are they going to move to a new house?”

10.3 Going To vs Will for Future Plans and Predictions

Two common ways to express future actions in English are using “going to” and “will”. Understanding the difference between these two forms is essential for effective communication.

Future Tense Comparison

“**Going to**” is used for plans or intentions that have already been decided before the moment of speaking.

Example. “I am going to visit my grandparents next weekend.”

This indicates a pre-planned action.

“**Will**” is used for spontaneous decisions made at the moment of speaking or for predictions about the future.

Example. “I will help you with your homework.”

This indicates a decision made on the spot or a prediction based on current knowledge.

10.4 Present Continuous for Future Arrangements

The present continuous is often used to talk about fixed plans and arrangements, usually when a time is specified.

Present Continuous (Future Arrangements)

Structure:

- Affirmative: Subject + am/is/are + verb-ing + time reference
- Negative: Subject + am/is/are not + verb-ing + time reference
- Interrogative: Am/Is/Are + subject + verb-ing + time reference?

Examples:

- “I’m meeting the manager at 3 p.m.”
- “She’s flying to Madrid next Monday.”
- “Are you having dinner with them tonight?”

10.5 Future Perfect Tense

The future perfect tense is used to describe an action that will be completed before a specific point in the future. It is formed using “will have” followed by the past participle of the verb.

Future Perfect Tense

Structure:

- Affirmative: Subject + will have + past participle
- Negative: Subject + will not have + past participle
- Interrogative: Will + subject + have + past participle?

Example. “By next year, I will have completed my degree.”

10.6 Future Continuous Tense

The future continuous tense is used to describe actions that will be in progress at a specific time in the future. It is formed using “will be” followed by the present participle (verb + -ing).

Future Continuous Tense

Structure:

- Affirmative: Subject + will be + verb-ing
- Negative: Subject + will not be + verb-ing
- Interrogative: Will + subject + be + verb-ing?

Example. “This time tomorrow, I will be flying to Paris.”

10.7 Future Perfect Continuous

The future perfect continuous focuses on the duration of an activity up to a point in the future. It is formed with “will have been” + verb-ing.

Future Perfect Continuous

Structure:

- Affirmative: Subject + will have been + verb-ing
- Negative: Subject + will not have been + verb-ing
- Interrogative: Will + subject + have been + verb-ing?

Example:

- “By noon, they will have been working for five hours.”

10.8 Time Expressions

Common future time markers help identify the correct tense: *tomorrow, next week/month/year, in two days, soon, later, this evening, by 2026, at 5 p.m., on Monday.*

10.9 Common Mistakes with Future Tenses

Learners often confuse the use of “going to” and “will”. Here are some common mistakes to avoid:

- Using “will” for planned actions instead of “going to”.
- Confusing the future perfect with the future continuous.
- Omitting the past participle after “will have” in the future perfect.

10.10 Future Simple vs Future Continuous

The future simple describes actions that will happen, while the future continuous emphasizes actions that will be ongoing at a specific future time.

10.10.1 Timeline

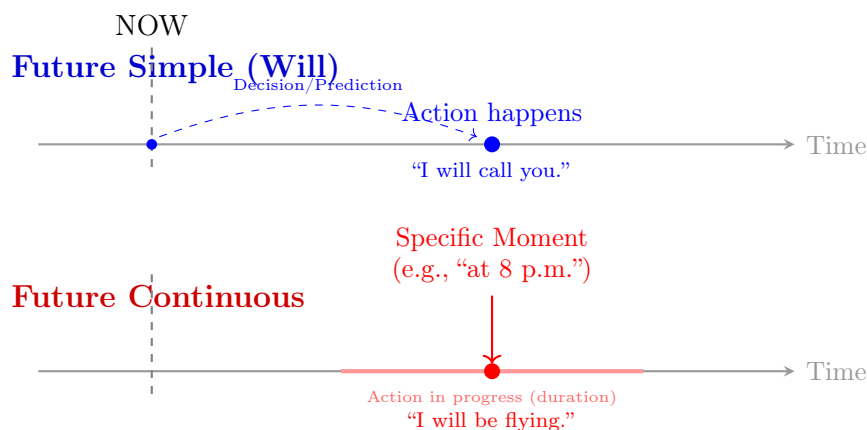

Figure 10.1: Visual Comparison: Future Simple vs. Future Continuous

10.11 Future Perfect vs Future Perfect Continuous

10.11.1 Timeline

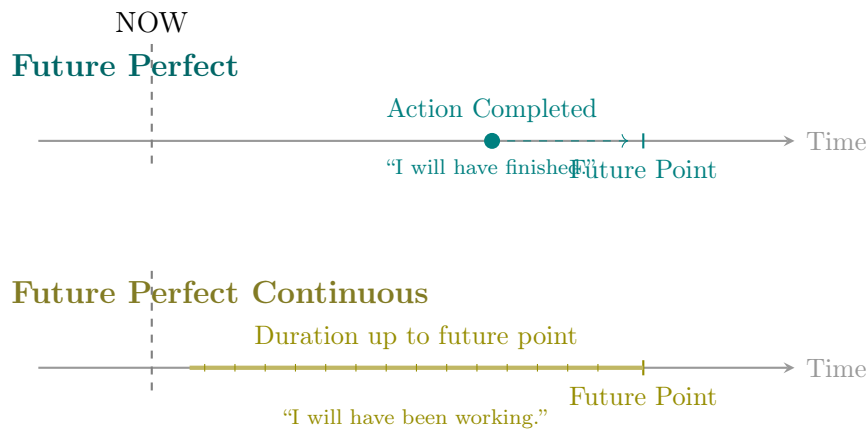

Figure 10.2: Visual Comparison: Future Perfect vs. Future Perfect Continuous

Exercise 2: Correct the mistakes in the following sentences.

Practise choosing between “will” (decisions/predictions), “going to” (plans/intentions), the present continuous (arrangements), the future continuous (in-progress actions at a future time), the future perfect (completed by a future point), and the future perfect continuous (duration up to a future point).

10.15 Summary

Use “going to” for planned actions; “will” for spontaneous decisions, promises, and predictions; the *present continuous* for fixed arrangements; the *future continuous* for actions in progress at a future time; the *future perfect* for actions completed before a specific future time; and the *future perfect continuous* to emphasize duration up to a future point.

Conditionals: If Clauses

19.1 Lesson Objectives

In this chapter, you will learn:

- The four types of conditional sentences
- Zero Conditional (facts and general truths)
- First Conditional (real future possibilities)
- Second Conditional (hypothetical present/future)
- Third Conditional (hypothetical past)
- Mixed conditionals

19.2 Reading Context

Dialogue: Planning and Regrets

Alice: What will you do **if** it **rains** tomorrow?

Bob: **If** it **rains**, I'll **stay** home and watch TV.

Alice: That's boring! **If** I **were** you, I'd **go** to the cinema instead.

Bob: Good idea. I wish I had more money though. **If** I **had** \$1 million, I'd **travel** the world!

Alice: Me too! By the way, did you pass your exam?

Bob: No, I failed. **If** I **had** **studied** harder, I **would** have passed.

Alice: That's a shame. You'll do better next time.

19.3 Conditional Overview

Conditional sentences have two parts:

- **IF-clause:** The condition
- **Main clause:** The result

If + condition, result OR result **if** + condition

19.4 Zero Conditional: General Facts and Truths

Use for things that are **always true** (scientific facts, habits, instructions).

Zero Conditional Structure

Structure: If + present simple, present simple

Examples:

- If you **heat** water to 100°C, it **boils**. (*Si calientas agua...*)
- If I **don't sleep** well, I **feel** tired. (*Si no duermo bien...*)
- You **get** wet **if** it **rains**. (*Te mojas si llueve*)

Use: Scientific facts, general truths, automatic results

19.5 First Conditional: Real Future Possibilities

Use for **real situations** that are likely to happen in the future.

First Conditional Structure

Structure: If + present simple, **will** + base verb

Examples:

- If it **rains** tomorrow, I'll **stay** home. (*Si llueve mañana...*)
- If she **studies** hard, she'll **pass** the exam. (*Si estudia mucho...*)

- If I **were** you, I'd **talk** to her. (*Si yo fuera tú...*)
- She'd **travel** more if she **had** time. (*Ella viajaría más si...*)

Use: Unlikely or impossible situations, advice, dreams

Important: Use **were** for all persons with "be" (formal):

- If I **were** rich... (NOT: If I was rich - informal)

Other modals possible: could, might

- If I won the lottery, I **could** retire early.

19.7 Third Conditional: Hypothetical Past

Technology and Communication

24.1 Lesson Objectives

In this chapter, you will learn:

- Vocabulary related to computers and technology
- How to explain technical concepts in simple terms
- Communication strategies for checking understanding
- Present your interests and abilities

24.2 Speaking Activity: Your Unique Talent or Interest

Personal Interests

Everyone has unique talents, abilities, or interests that make them special. Being able to talk about your passions in English is an important communication skill.

Sample Response:

I'm interested in mountain biking. I started riding when I was 14 years old. My first track in this sport was quite challenging, but it got me hooked. Generally, I ride with my brother now.

In mountain biking, we talk about different "lines" - these refer to the different paths that you can take on a track. Each line has its own challenges and requires different skills.

24.2.1 Discussion Questions

1. What is your unique talent, ability, or interest?
2. When did you start?
3. Who do you share this interest with?
4. What do you enjoy most about it?

24.3 Technology Vocabulary

24.3.1 Computers and Software Development

Technology and Computing Terms

- **Front-end** (*Interfaz de usuario / Cliente*)
 - The part of a website or application that users see and interact with
 - Example: "The front-end developer designs the user interface."
- **Back-end** (*Servidor / Sistema de fondo*)
 - The part that works behind the scenes to make everything function

 - Example: "User information is stored in the database."
- **Framework** (*Marco de trabajo*)

- **API (Application Programming Interface)** (*Interfaz de programación de aplicaciones*)
 - A way for different software applications to communicate with each other
 - Example: "The front-end sends requests to the back-end through an API."

Explaining Technical Concepts

Software Architecture Explanation:

To explain the architecture of any app's software, there are generally two principal components: the **front-end** and the **back-end**, plus a **database**.

- The **front-end** is the part that users see and interact with
- The **back-end** works behind the scenes to make everything function properly
- These two components work together to provide a seamless user experience

Communication between components:

The communication between front-end and back-end typically occurs through **APIs** (Application Programming Interfaces). The front-end sends requests to the back-end server, which processes these requests, interacts with the database if necessary, and then sends back the appropriate responses. This allows for dynamic content updates without needing to reload the entire page.

24.3.2 Popular Frameworks

- **React**: Front-end framework based on JavaScript, owned by Meta (Facebook, Instagram, WhatsApp)
- **Django**: Back-end framework based on Python, owned by Django Software Foundation

26.9 Content

This chapter is under development.

Write a short reflective paragraph, thinking about your team's performance in both conversations today.

Our team performed well during both conversations: every member participated actively, contributed thoughtful ideas, and engaged in constructive (and sometimes playful) debate to defend their views. We listened respectfully, built on one another's points, and left with clear next steps to follow up on our decisions.

26.10 Differences Between Remains, Remnants, and Leftovers

The distinction between *remains*, *remnants*, and *leftovers* lies in their scope and context. *Remains* refer to what persists after something has been consumed or destroyed, typically denoting larger or more substantial portions. *Remnants* are smaller fragments or pieces left from a larger whole, often suggesting limited utility or value. *Leftovers*, in contrast, specifically designate uneaten food remaining after a meal, preserved for future consumption. In essence, remains encompass any residual parts, remnants are minimal fragments, and leftovers are reserved foodstuffs.

The distinction between *remains*, *remnants*, and *leftovers* depends on scale and context. *Remains* denotes what persists after something has been consumed or destroyed and often implies larger or more substantial portions. *Remnants* refers to small fragments left from a larger whole, typically with limited use. *Leftovers* specifically describe uneaten food saved after a meal for later consumption.
